

Student Satisfaction Survey – Criterion II

NAAC 2022 – 2023

How much of the syllabus was covered in the class?

363 responses

How well do the teachers come prepared for the classes?

363 responses

How have been teachers communication skills?

363 responses

Teacher's approach towards teaching can best be describes as

363 responses

Is fairness followed by the teachers in the evaluation of Intra Semester Exams (ISA)?

363 responses

Does teachers give feedback on the work assignments?

363 responses

Is college taking an active interest in promoting internship, student exchange, field visit opportunities for students?

363 responses

The teaching and mentoring process in college facilitates cognitive, social, and emotional growth.

363 responses

The institution provides multiple opportunities to learn and grow.

363 responses

Teachers inform us about expected competencies, course outcome, and program outcomes.

363 responses

Your mentor does a necessary follow-up with an assigned task to you?

363 responses

The teachers illustrate the concepts through examples and applications.

363 responses

The teachers identify your strength and encourage you by providing the right level of challenges.

363 responses

Teachers are able to identify your weaknesses and help you to overcome them.

363 responses

Does college makes an effort to engage students by monitoring, taking reviews, and continuous quality improvement of the teaching-learning process?

363 responses

Teachers use student-centric methods, such as experiential learning, participative learning, and problem-solving methodologies for enhancing learning experiences.

363 responses

Teachers encourage you to participate in extra-curricular activities.

363 responses

Are college faculty making efforts to inculcate soft skills, life skills, and employability skills to make you ready for the world of work?

363 responses

Percentage of teachers using ICT tools such as LCD Projector, Multimedia, etc. during lectures.
363 responses

The overall quality of teaching-learning process in your institute is very good.
363 responses

Q1. Write your observation/suggestions to improve the overall teaching learning experience by the college.

My overall experience of teaching learning in the college is very good.

I feel teachers should engage the class more, make it interactive specially the afternoon lectures. Also use projectors, show ppt with pictures and not most of the reading material. Pictures help to remember better rather than just slides. Please remove fines on books in the library as it demotivates the students to read books.

"Encourage the students to do more activities like sports and new courses

The college should acknowledge the cultural and sports achievements.

Teacher should use different teaching methods . Should give everyone equal opportunities in participating in activities . Should understand student emotionally.

There should be good conversation between students and teachers to understand their learning problem

More events should be conducted in college premises

I would suggest more involvement of the students and help from teachers in understanding the requirements of the course.

Proper time management should be there.

Teaching is excellent not at all problem in any subject

Need some improvements in technology

The teachers can teach and prepare the students with the employment skills, soft skills, practice experimental learning, engage more field trips, encourage students to come out of their weaknesses, etc

I do not feel to improve anything.

Overall I would say that the teaching learning process is carried out very systematically in our college. No improvements needed.

Our college does not need any improvement

Theoretical subjects can be more interesting

Setting of timetable need b check, teacher should also motivate every student to participate in various events

There should be more field visits and teachers should include more examples to make the concept easy.

5 mins break should be allotted to students sometimes for active learning.

There should be improvement in Projector because it gets error sometimes.

Try to reach every student and ask for their doubts

There should be a PE lecture in week once or twice

No suggestions

Explanation of any concept with more examples

Instead of giving syllabus to students to present the teacher should take initiative to do and give students something else as an assignment.

Teacher should teach in a interactive way so that the students don't feel sleepy.

Teaching is ok but teachers dont encourage students to participate in several events and does not give attendance even if we are doing something for their college. Every student who is making effort to bring the college name up should be given full support and attendance from the teachers.

Most of the the teachers are assigning their syllabus to students as presentation topics in which the student is unaware or unfamiliar with the concept and explains a new topic and it becomes difficult to understand.

There should be proper maintenance of girls washroom. Also girls hostel should be provided to the students.

Some teachers should come prepared to class and should work on their respective languages.

Teachers should give tests after each topic

The teacher learning should be more based on practical learning rather than theoretical

Teaching method such as excursion should be used effectively

The college should take well qualified teachers and should consider student's feedback.

Which topic needs practical teaching for that topic ppt, videos can be used.

Teachers must take students on field trips to get more knowledge and information about subject and know the environment.

Teacher must take students on field trip to get more knowledge and information about subject and know the environment.

Practical experiences and field trips should be organised for the students. Students should be encouraged to participate in extracurricular activities.

More activities should be conducted

I think every subject teacher should take counselling session once in a month regarding subject studies.

Assignment loads must be less, college must be left early as many students travel from long distance and collage should be at 9am in the morning as for few reaching at 8:30 is quite difficult

Should encourage and support the students which will make them also enthusiastic in learning

First some teachers don't respect the students when they greet them in morning specially me and secondly first the teacher should learn all the manner and thirdly to tell that little bit of improve is needed

Teachers should give more examples while teaching. Maybe videos can be shown so that we understand much better. Keeping an eye on every student to see if they are attentive.

Lectures should be increase

Teaching should be made more interesting by using ICT tools

Overall teaching learning process is excellent

Teacher should also motivate students to participate in other activities and motivate them

Should have compassion and empathy so that than students are more willing to Cooperative and more motivate to learn

Encouraging each student to participate in co-curriculum activities

More examples while explaining

Encouraging every student to participate in co-curricular activities

Teachers should talk about competitive exam and prepare for it, take workshops

The teacher's explanations can be very well understood

No suggestions

Teachers explain can be understand

Teachers should make students aware about competitive exams and help them to prepare for the same.

All the teachers must behave good with the students if they want the students to behave good with them. many courses are only applicable to commerce students but not for BABEd students (for ex-beautician course). If the faculty wants the students to participate and win more trophies and medals for inter-collegiate competitions or any programme or event going within the college then it should be made compulsory for the teachers to give the necessary attendance given to the students participating in the activities as it is frequently observed that many of the teachers refuses to give the attendance for students.

They must provide hands on training for students.

Proper facilities with great guidance

Teachers need to allow other students to participate in event rather than only sending that one group again and again. Many events happen and we do not even know about those events directly we can see status of some of our classmates winning the trophy

Timing of college should be changed as students do not reach home before 7 and then they don't get time to prepare anything

Teachers must not do partiality in providing internship marks. Had a terrible experience in T.Y. Me and my classmate went to a same school for internship and got 50/50. But the

college decreased my marks to 39 and hers to just 48. This is injustice. The college faculty does not know who worked more in the school. I do not know on what basis they put marks.

For internship if you and your partner get 50/50 college faculty will reduce the marks making partiality between us. For example, they will make my marks 39/50 and my partners 48/50. I don't know on what basis they do this. They are never there to check on us. This has to stop.

The electronic appliance used for teaching should be changed

Teachers are very good at teaching. Electronic appliance used for teaching should be upgraded

Syllabus should be taught by the teacher and not give students to present and make your work easy Teaching learning experience is excellent

Improvement in projector

I respectfully suggest that the teachers may benefit from improving their English skills, as this could enhance the students' language proficiency.

Please include more of soft skills, interview preparation, life living skills, i.e. more of experimental learning should be included for BABEd students.

"Encourage cooperative learning.

Teachers should be fair enough in making decisions. While students point out teachers mistake then teachers should not point students mistake.

Few teachers are really good and do justice with their profession, however some teachers need to accept that they can be wrong at times and there is always scope for improvement, because of minor issues they shouldn't make it a hazard for the students.

It is good

There should be more practical in teaching learning process

Inclusion of more practical learning

Complete portion on time and give students heads up before allotting any work , if allotting assignment or correction of books , journals to be told in advance , the prescribed syllabus should be up-to-date.

Time management . The ISA should be completed one month before exam

Syllabus should be completed in restricted period time so that students don't get panic at last moment.

Focusing on field visits so that learning should happen in that environment as well

Teachers should not be biased towards only particular students. Each student is important each student have come to learn something so teachers should do accordingly.

Portion should be completed at least 2 weeks before exams so that revision can be done.

"The teachers should help students to learn for competitive exams and make them aware or provide knowlegde of other challenges in the field and not just concentrate on the syllabus.

At the same time teachers should encourage participation in co-curricular activities."

Teachers should make the students aware of different competitive exams.

"1. More focus on practical knowledge

2. Should encourage students to participate in cultural programme

3. Should not put an overload of work on the students especially when the exams are nearby

4. Should add some new updated syllabus

5. Should teach some out of syllabus topics for general knowledge

6. General instructions or any notice to be given 1 week prior to the particular day and not one day/night before it

7. The authorities should take an in charge to insure that the syllabus is completed one or 2 weeks before the exams

8. Giving the syllabus topics as isa/assignment/ppt topics is not advisable, rather they should give out of syllabus topics for the same.

9. Provide more knowledge on the competitive exams

10. Students should be briefed about career opportunities

11. DHE portal should be updated on time"

"More focus should be given to practical learning.

Students should be informed about the projects and assignment in advance.

Syllabus should be complete on time and not few days before the semester.

Any general notice should be circulated to the students 1 week prior the event/programme

Giving syllabus topics as isa should be stoped.

Students should be given knowledge should be provided on competitive exams

Students should be briefed about future career opportunities.

DHE portal should be updated on time"

"More focus should be on practical teaching rather than excessive load of theory.

Teachers should complete the syllabus on time and not wait till the exams approach as it put the students in stress and depression.

Any general notice should be circulated to the students one week prior the events/program.

Giving syllabus topics as an ISA should be stopped.

Syllabus should be completed atleast two weeks before the semester exams.

Students should be briefed about future career opportunities.

DHE portal should be updated on time."

"•Need to focus more on practical learning and understanding that giving students a lot of Homework is not the solution to all problems most of the things should be done during the class hours this will reduce students burdens to some extent

· Any general notice/circular should be circulated with students at least one week prior

Authorities

· Authorities should take interest and ensure that syllabus should be covered at least 2 weeks prior

· Students should be briefed with career opportunities "

Faculty members should be appointed on time.

Teacher is teaching in class but sometimes teachers voice not reaching to students sitting on last bench. Some teachers are so good but some are not at all they come teach and go.

Q2. Mention the plus points (positive) of your college.

ICT lab library is good which helps us for our assignment, project and etc. Teachers are also helpful

Active activities take place, library is good. Teachers are good. Ict lab is good.

"Encourages students to participate in sports and new courses

Has good teacher and non teaching staff

Nothing . Neutral experience of learning

They support youths in their sports and study

Different courses and helpful talks

College is engaged in both academics and co curricular activities which develops a student very well.

Library is well maintained

All the teacher are excellent, they explain the topic very well, they take extra effort for our better understanding. The non-teaching staff also cooperate very well

"Institute has very good teachers and very nice facilities regarding teaching and all separate courses.

Most of the teachers are punctual except some

Talented and all-rounder students

My college is doing well in terms of teaching and the syllabus wise structural teaching is another plus point of my college

A lot of extracurricular activities are held in our college which indeed motivates us to participate in them. Even seminars are been conducted regularly which gives an opportunity to learn new things.

Participation in cultural events cocurricular activities sports events

Teachers give good examples while teaching

So many opportunities giving to us

It motivates all of us for studying and doing other activities

Good teaching nature

Helps in overcoming all the situations.

Helps in studying and other activities.

Makes revision before the exam ."

Very supportive in academic as well other activities

Cooperative teaching and non teaching staff,way of teaching is good

All the teachers are very helpful and kind. They always keep the students motivated. We can share our problems to them and the teachers try to give us the solutions on the same.

Some of the faculty members are too good and supportive

Teachers are very helpful and kind

Conducting various seminars and providing workshops

"Active participation in extra curricular activities

Good staff teaching as well as non- teaching

Different programs are organized "

Plus points is that students get the chance to share their opinions on any matter and the teachers are also very supportive and encourage the students.

Every good college and properly well disciplined .

Has a good sports department which encourages each and every student to participate.

Teachers are cooperative and available to solve difficulties

Giving change to every students to come forward

Extracurricular activities

Provides two degrees at one time and it's well disciplined

Everything is good.

Gives opportunity to everyone

Motivates the students

Overall development of child

The teachers are well updated with their knowledge and provides better teaching learning environment.

Overall good

"Most of the teachers are have best teaching qualities in them.with great knowledge and the non-teaching staff is also great.

They have plants all around the college

There is more motivation given to students in our college

Our college gives us opportunity to learn, enjoy, and grow together.

Projector are provided in class

Using projector

Welcoming atmosphere

Teachers are helpful

It gives every student an opportunity to showcase their talent

It gives every student to showcase their skills and talents

"There are multiple events, field trips and seminars that help in students all round development.

ICT tools are well developed.

Teachers are highly qualified. Many of the teachers have also done phd.

They are friendly

It's very helpful in building each and everyone currier

Excellence ,Everywhere ,Everytime

Overall it's a good college. The cultural activities are superb. The morning prayers are very nicely done by the students.

Excellent

Faculty is very good. Teachers try their best to take out the best from the students.

All teachers are highly qualified

Understanding staff

Lot of learning talks was conducted in our college

Has a really good teaching faculty

All facilities are available

Provides many other courses, facilities for students. A lot of extra-curricular activities take place throughout the year.

Teachers encourage the students to learn better

Faculty

The college is very competitive and encourages students to work hard.

Good teaching, more of extra-curricular activities, teachers are very good, college is well-mannered etc

The sports faculty is amazing the way it motivates students to participate in sports events more and more

Gives an opportunity to the students to improve their skills

Taking many seminars, provide quality learning experience, interactive learning, availability of ICT whenever needed. Availability of research papers and competitive exam preparation books in college library.

Organize many seminars, use of PPT, Availability of ICT lab whenever needed, Effective Teaching.

They encourage all the students to participate in any programme

Library

Teachers well expert in their subjects.

Highly qualified and highly experienced teaching staff

Good in sports activity

Very effective Teaching

The college encourages inter-collegiate events which helps in the overall development of students.

Some teachers are very supportive. A few of them. They are the pillars of the college. Even the non-teaching or multi-tasking staff is good. I really appreciate their hardwork towards us.

Trs are very hardworking and polite towards students

All Trs are very hardworking and polite

Equal opportunity for students to play sports

Projection learning

There are mentors to help in difficulties and Vidya Prabodhini teachers are understanding.

Takes a part in many activities

All teachers are good

Using black board instead of LCD projector

Extra curricular activities

The college's participation spirit is very high, which highly encourages students to bring out their hidden talents and help them gain confidence. The teachers are very dedicated towards teaching and very helpful.

Maintain excellent consistency in teaching process

The faculty and the non teaching staff are very good and cooperative. Well maintained infrastructure like library, classes.

"Ict's are installed in all classes

Library offers free educational resources

It has good infrastructure."

Nothing

College has won many events but never give attendance properly.

The plus point is that we have the best teachers in our institution.

We get here more opportunities

College support the overall development as a student teacher through various activities like internship

The college takes us to attend various seminars and many guest lectures on important topics are also organised.

Morning assembly, good education teachers

Learning environment is highly peaceful and allows thoughts to cultivate effectively.

We get 2 degrees in 4 years

We get 2 degrees in 4 years

"1. The major plus point of this course is that we get 2 degrees in 4 years and one year is saved.

2. The non teaching staff is the best and very understanding.

"It provides two degrees in four years.

Good and responsible MTS.

"Students can get two degrees in four years.

Non-teaching staff is the best"

"They are very few plus points, one of them is we are getting two degrees in 4 years.

We have a library

Library faculty and facilities is very good

Library is updated .
