A brief write-up about the Event (In about 300 words):

SYBABEd. (Division - A) Geography Study Field Trip. Students noticed the various economic activities on the way to Ustem Village of Sattari. They observed the livestock activities, cashew nut planation, agricultural activities etc. This village is drained by major tributary Ustem river and it is the major source of fresh water used for domestic and commercial purpose. This place has a potential to go ahead with the river rafting, inland fisheries etc. If we sustain the environment then it will be helpful for the locals to get the better income. The local panchayat can start eco friendly accommodation facilities, small resorts, providing local food items, provide rent bikes, arrange jungle safaris, arranging hike , trekking, mountain climbing or the adventurous activities and perform cultural programs infront of the tourist if this area can be developed as the river rafting spot. There were many activities and the games that were arranged for the students such as stone painting related to the nature geography, spot prizes on the questions asked etc.
